FINAL YEAR PROJECT, 2026

Every mangrove we plant gets a record.

A web platform for mangrove restoration on the Karachi coast, built with Saltwater Marina.

Cut stumps on the Kaderu Island flats, 3 Oct 2026

Planting is the easy part. Knowing what survived is the hard part.

01 Every drive and every plot gets a mapped record.

02 Volunteers photograph each plot from the same marked stakes.

03 People who adopt a mangrove follow the plot it went into.

THE PUBLIC SITE

Open to anyone who wants to check.

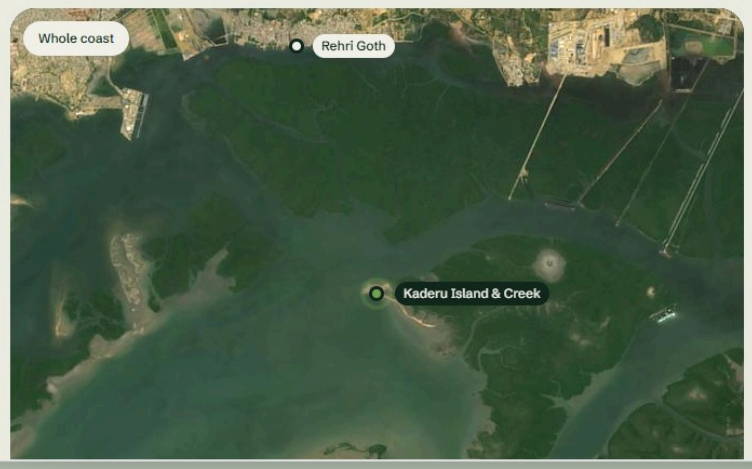

A satellite map of the sites, the Journal of past drives, and the story behind the project.

Timar / Sites

Every drive leaves from Rehri Goth.

Saltwater Marina runs one to two community drives a month from its home in Rehri Goth, out to Kaderu Island, Buddo Island and Kairi Creek. Bundal Island and Keti Bandar are on the map as places plots could go later. Nobody has surveyed them for Timar yet.

What is thinning Karachi's mangroves

Cutting, grazing, boat wash and less fresh water. The losses Timar is built to notice. →

Timar / About

Saltwater Marina and Timar.

Saltwater Marina is a community led conservation group from Rehri Goth, founded by Almas Kasmani. Its team works mainly on Kaderu Island, together with people from the Rehri Goth community.

Saltwater Marina does the work in the mud. Timar keeps the record of that work, so a day of planting becomes something people can check years later.

SIGN UP

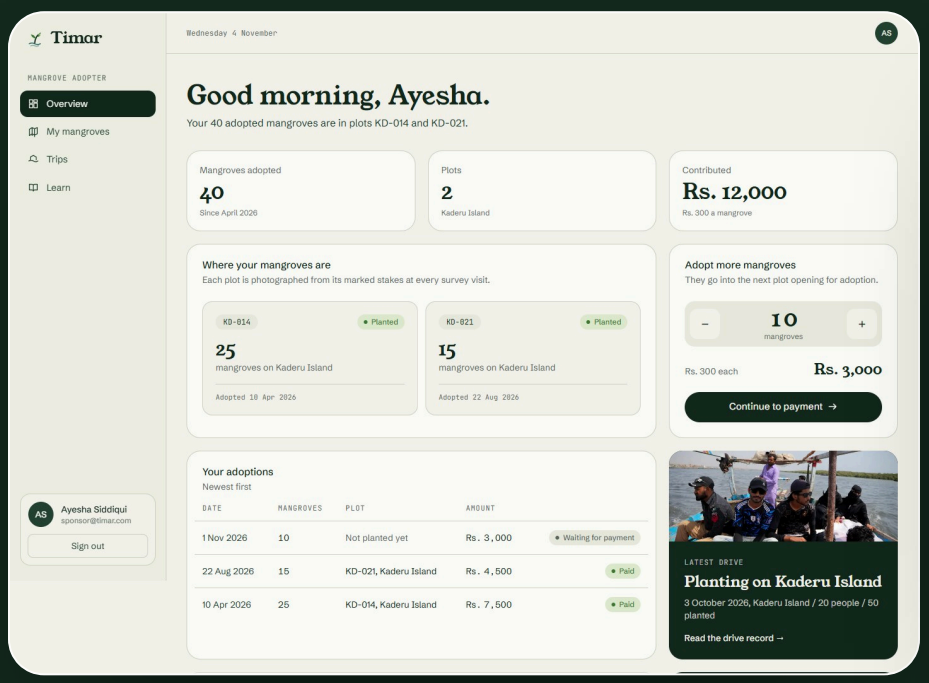

In with a 6 digit code sent to your email.

Then choose how you will use Timar: visit and adopt, volunteer, or run a carbon project as a company.

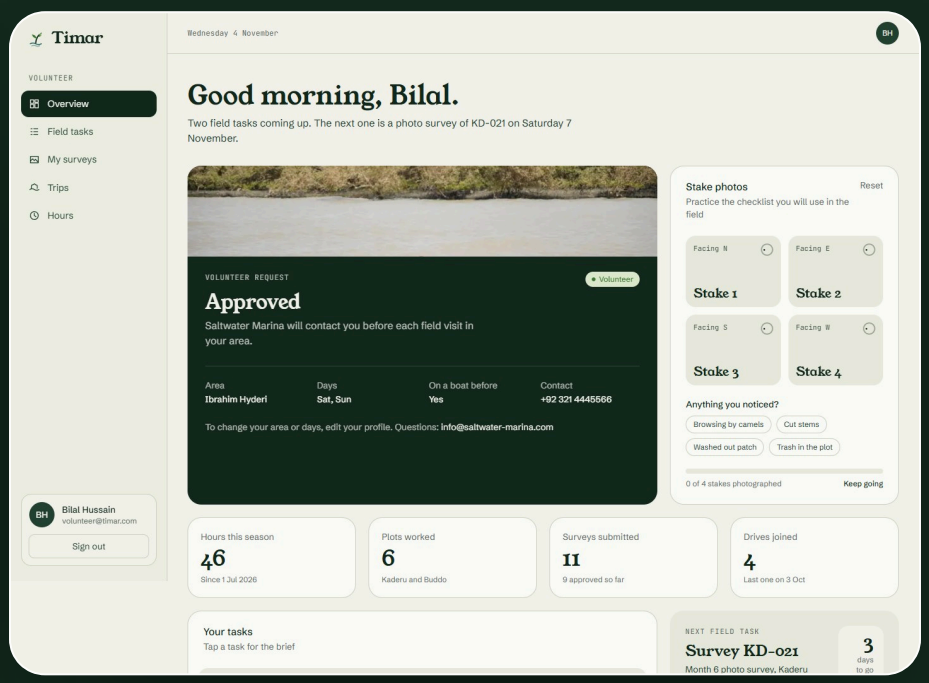

DASHBOARDS

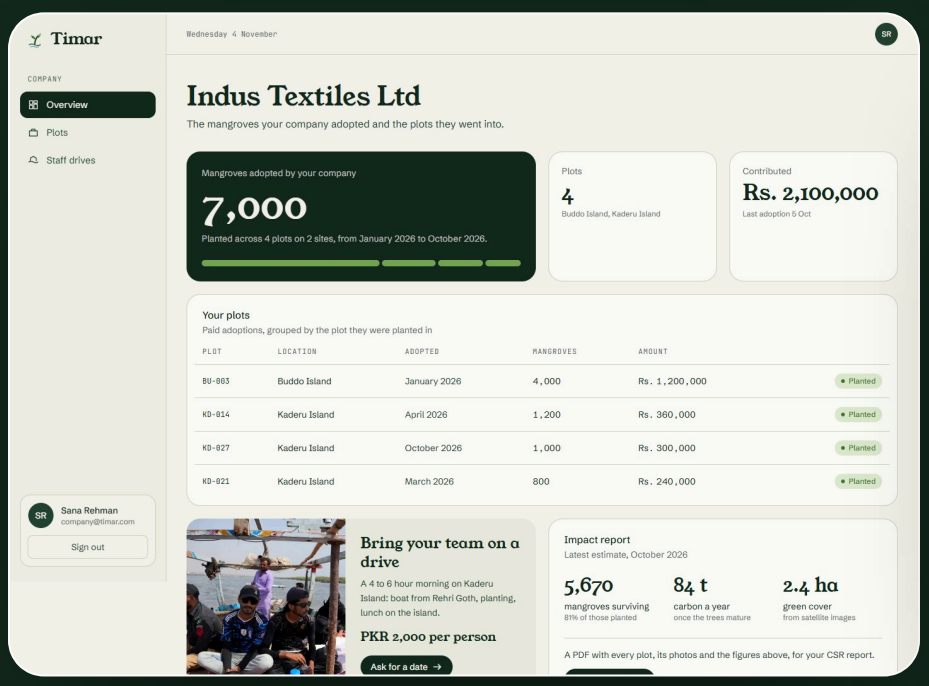

One login.
A dashboard for every role.

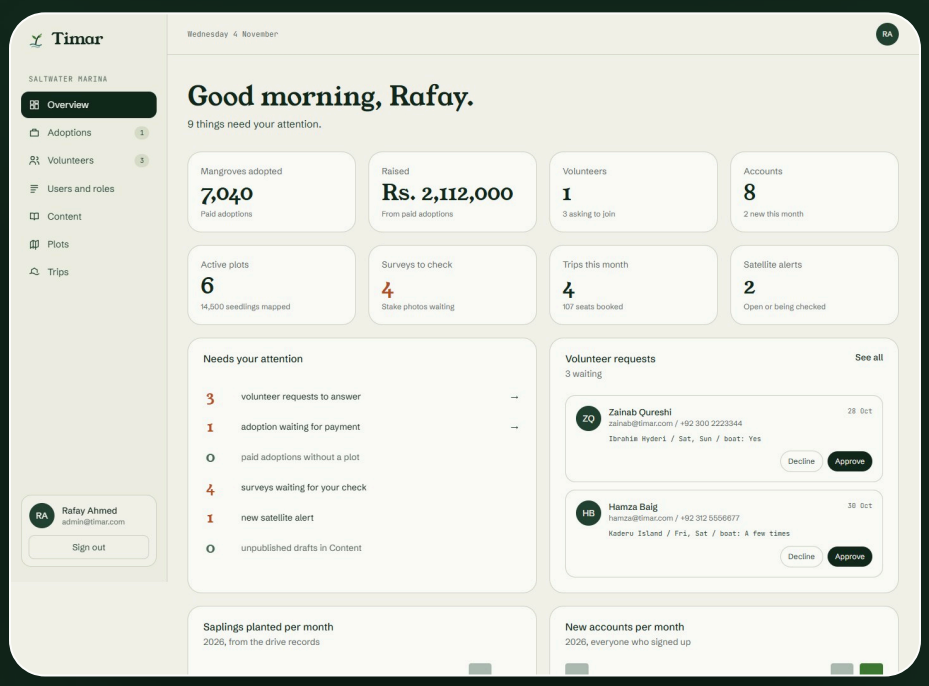

Adopter: the plots their mangroves went into

Volunteer: field tasks and the stake checklist

Company: mangroves adopted across its plots

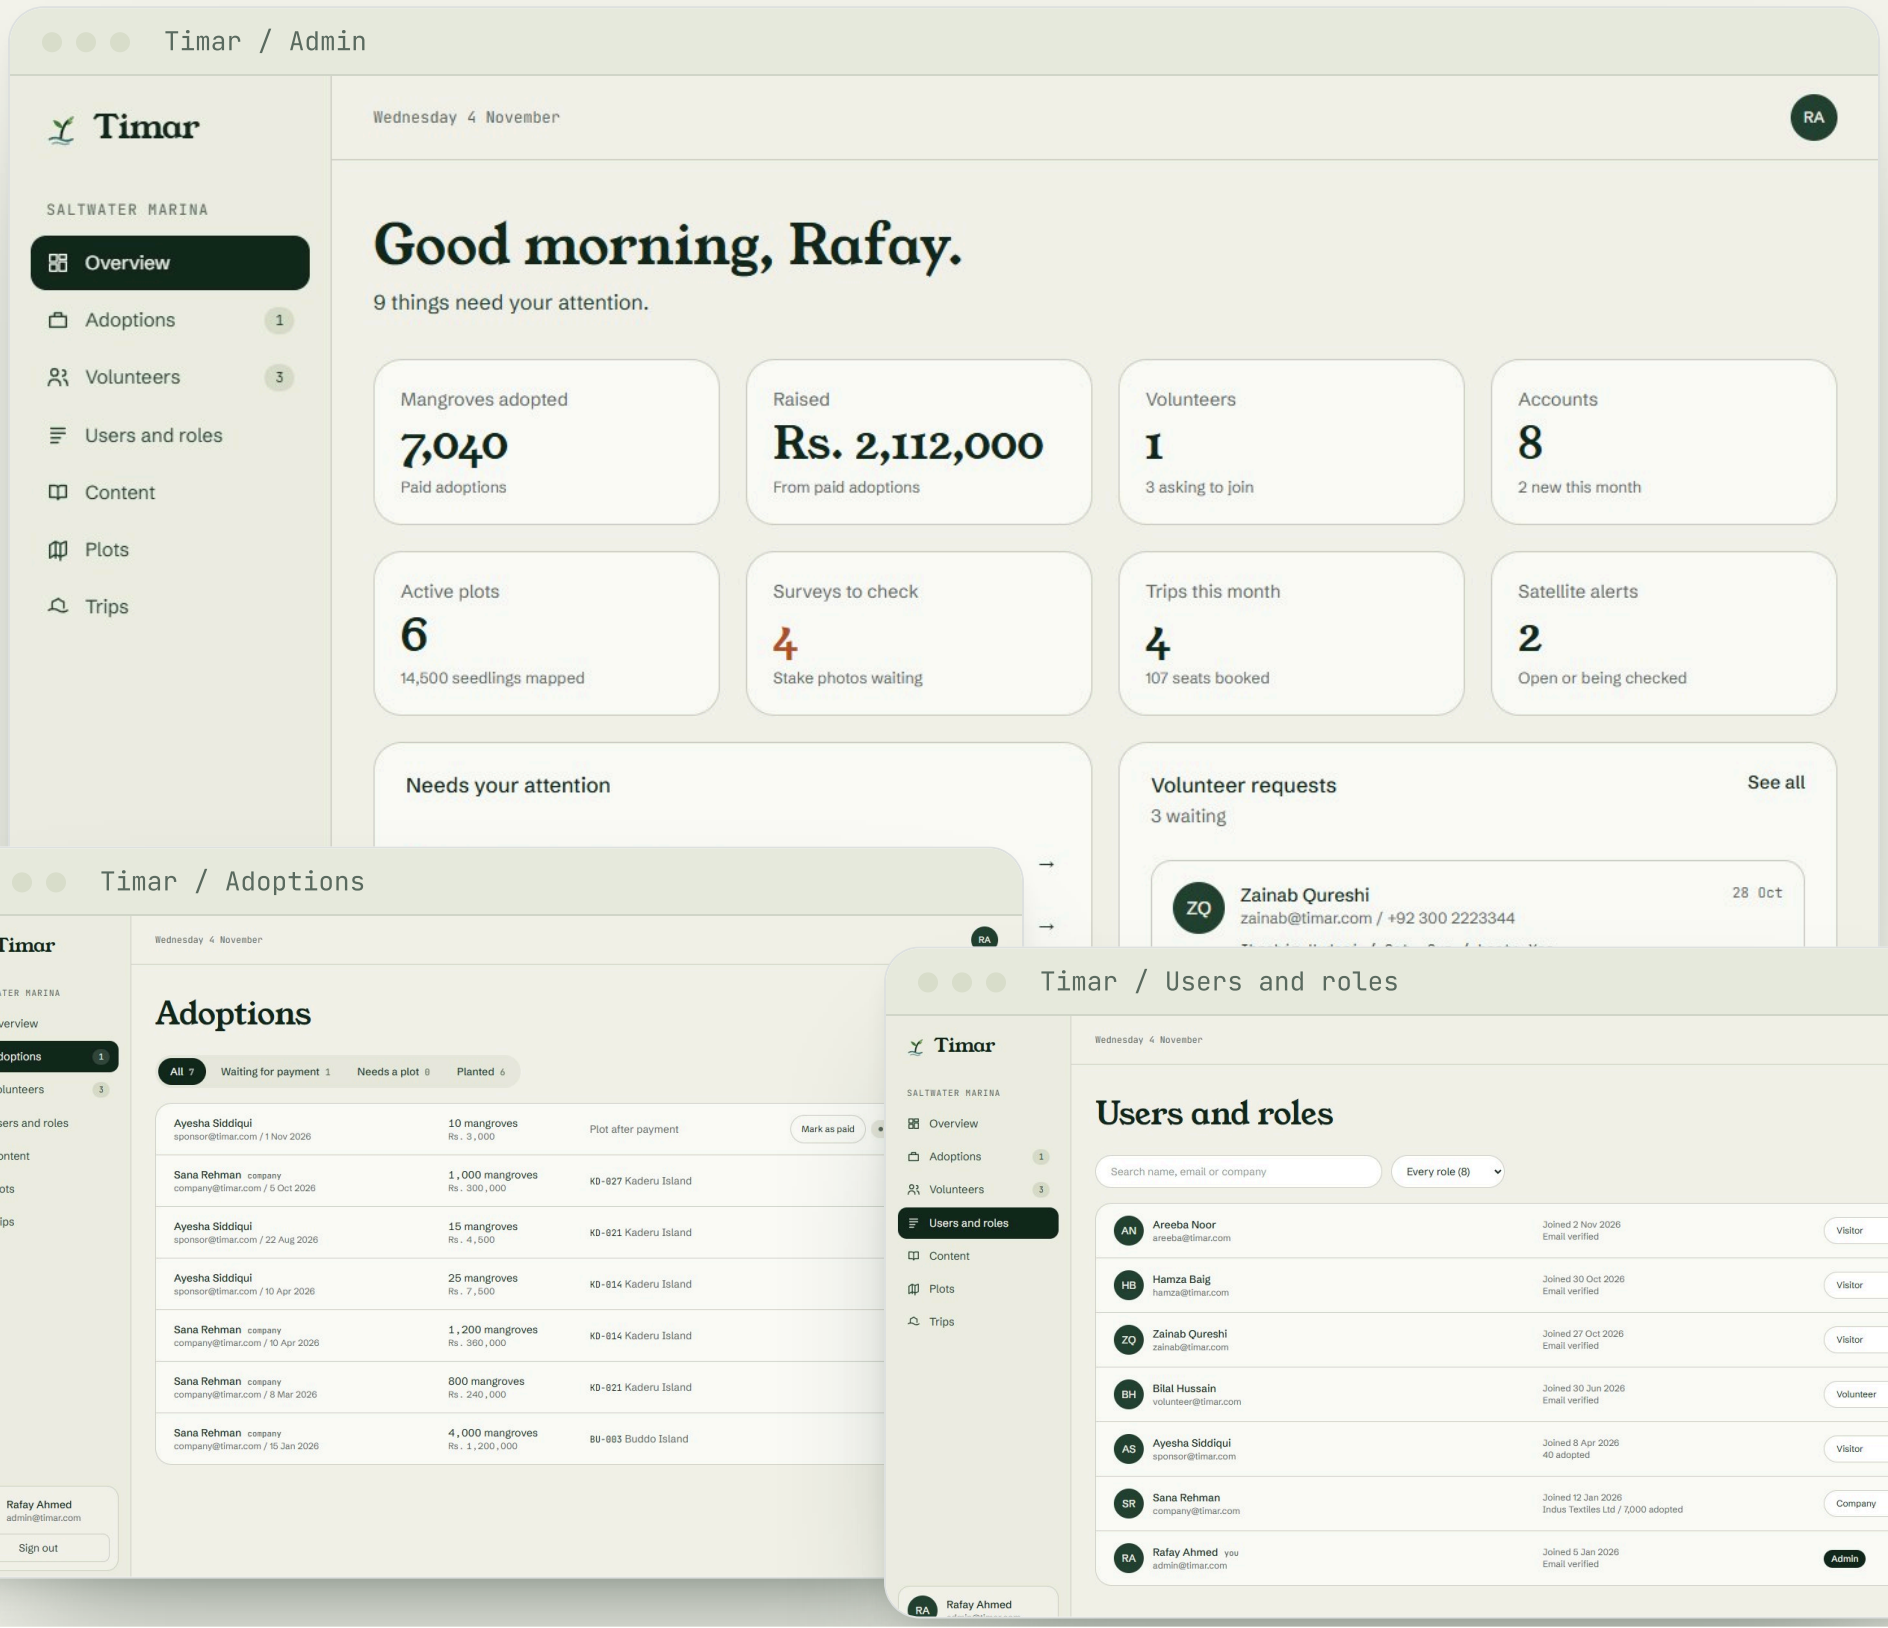

Saltwater Marina: what needs attention today

THE ADMIN PORTAL

Saltwater Marina runs it from one place.

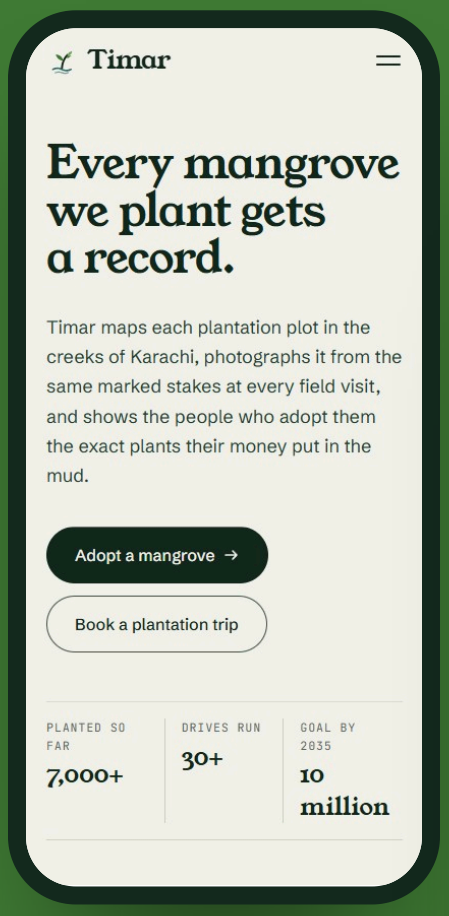

Adoptions and payments, volunteer requests, users and roles, and the Journal, all on a real database.

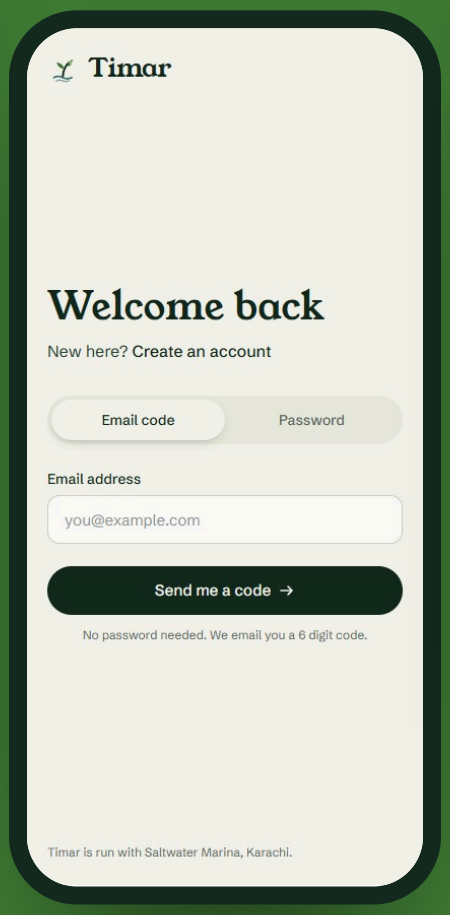

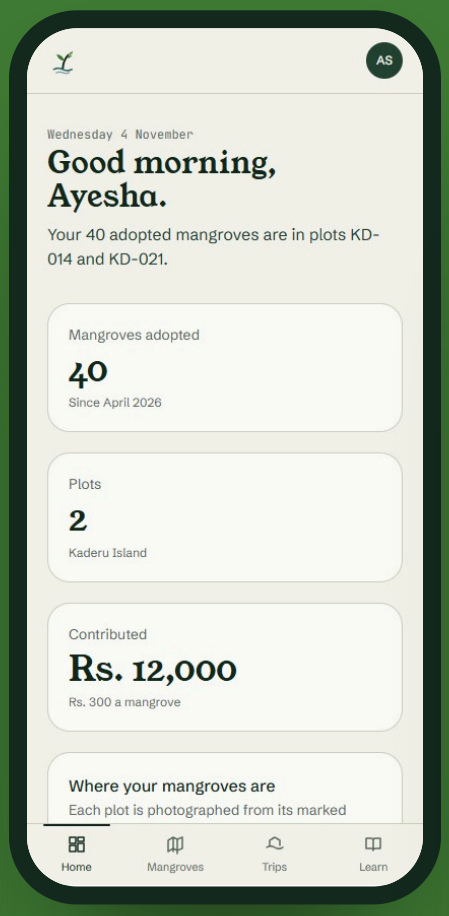

ON A PHONE

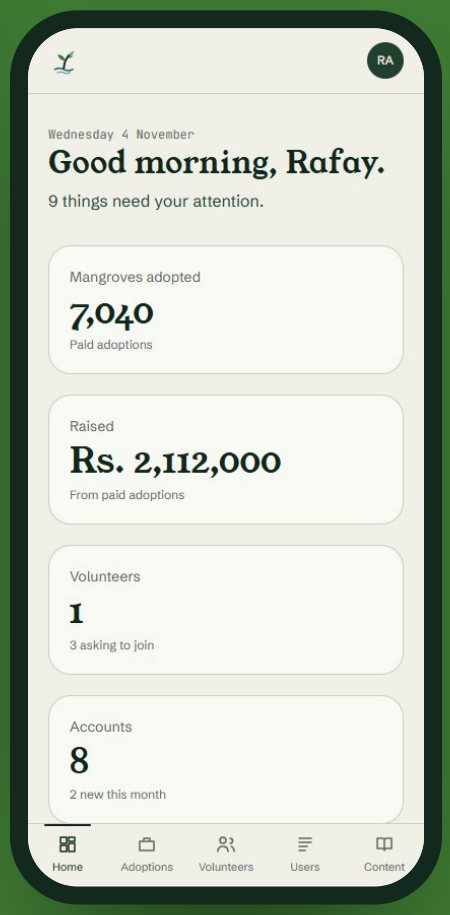

Made for the creek, not only the desk.

Volunteers use Timar out on the water, so every screen works on a phone.

OUR GOAL

The goal was never appreciation, but contribution to a great cause, for us and for the generations to come.
